Our story

Occupational Performance Specialists, OPS, commenced business in 2001 specialising in the provision of Occupational Therapy services and Ergonomic Equipment for WorkSafe and the TAC. The aim of our service is to maximise our clients independence in the completion of their daily activities. OPS have a team of experienced therapists who can provide an individually tailored Functional Education Program, FEP, to assist clients to resume those routine housework and gardening tasks including gutter cleaning, window cleaning, pruning, mowing and weeding.

Our specialised assistive equipment makes light work of those routine tasks around the home.

Through the use of our equipment and application of specific strategies clients can regain their independence and improve their self esteem thereby reducing their reliance on others.

Service includes development of a tailored program specific for each client, meeting the client at their home, demonstration and trial of equipment, travel, liaison with the treating doctor, and completion of a detailed report. OPS can also arrange for the supply of all equipment successfully trialed during the FEP.

OPS are an approved provider of services for WorkSafe and the TAC and as a general guide the cost of our FEP service is outlined below,

WorkSafe: 4 hours, Code MX36

TAC: 2 hours, Code OT0020, plus travel

Call our office for more information and to confirm product costs.
